

COVID-19 Outpatient Management

| General recommendations | |
|-------------------------|--|
| 1. | <p>Symptom screening occurs on all patients presenting at ambulatory clinic desk or Emergency Department.</p> |
| 2. | <p>Mask patients that meet symptom screening criteria:</p> <p>N95 is not appropriate for patient use.</p> <p>Babies can have a blanket draped over their carrier.</p> |
| 3. | <p>Care team assess patient and evaluate for COVID19 testing.</p> <p>See PPE donning and doffing pictorials.</p> <p>In outpatient: Room patient in special area, call provider to discuss next steps. If COVID testing is appropriate, refer patient to the appropriate testing site</p> <p>In ED: Room patients that meet screening criteria immediately. ED Care team to assess patient. Obtain NP swab for COVID testing if indicated.</p> <p>Use Staff Logs - refer to Staff Log Process and documents below:</p> <ul style="list-style-type: none"> • PUI Staff Contact Log • Confirmed Positive Patient Staff Contact Log <p>These logs are approved for enterprise-use.</p> |
| 4. | <p>If patient meets criteria for testing, follow guidance.</p> |
| 5. | <p>If patient needs hospital admission see Inpatient Management</p> <p>Ensure patient remains masked until admitted to hospital room.</p> |
| 6. | <p>Dismissal:</p> <p>If patient is tested, ensure they receive home care and prevention education</p> |
| 7. | <p>Cleaning:</p> <p>Follow site-specific practices for cleaning.</p> |
