PPE Checklist for Aerosol + Droplet Isolation Precautions

Donning:

1. Assistant or team member reads each step and verifies compliance at completion (closed loop communication)
2. Hand hygiene
3. Gown on
4. N95 mask with seal check (forcefully exhale, adjust as needed)
5. Eye protection on
6. Gloves on

Doffing:

1. Assistant or team member reads each step and verifies compliance at completion (closed loop communication). Self-contamination is extremely common and risky when removing PPE.
2. Dirty gloves off
3. Hand hygiene
4. Gown off
5. Hand hygiene
6. Leave room
7. Hand hygiene
8. Eye shield off
9. Hand hygiene
10. Remove N95 mask. Discard or re-use according to the guidelines for N95 use
11. Hand hygiene

If hand hygiene is performed for the required amount of time (20 seconds), doffing gear should take at least a minute and a half. It is paramount that an assistant watch for self-contamination.
Wearing PPE for Modified Droplet Isolation (Donning)

Hand Hygiene (15 seconds) → Gown → Mask → Eye Protection → Gloves

“Hygiene, Gown, Mask, Eyewear, Gloves”

Removing PPE after Modified Droplet Isolation

Remove Gloves → Remove Gown → Exit Room → Remove Eye Protection → Remove Mask

“Remove Gloves, Gown, Exit, Eyewear, Mask”
